

Logic Break: Neighbors

Make your own matrix.

Billy Brown, Willy White, Bobby Blue, and George Green all live on the same street. Their houses are painted brown, white, blue, and green, but no boy lives in a house that matches his last name. Also, each boy has a pet, and its name does not begin with the same letter as its owner's name. Also, you must find out the location of each house — is it the first, second, third, or fourth on the block?

1. George Green owns the bear.
2. Willy White owns the bull.
3. The white house is the last one on the street.
4. Neither the bear nor the bull live next to the first house.
5. Bobby Blue's house is not green.
6. The boy who owns the whale lives in the green house.
7. The gorilla lives in the first house, which is brown.

[illegible]
