

## GeoGebra Lab 1

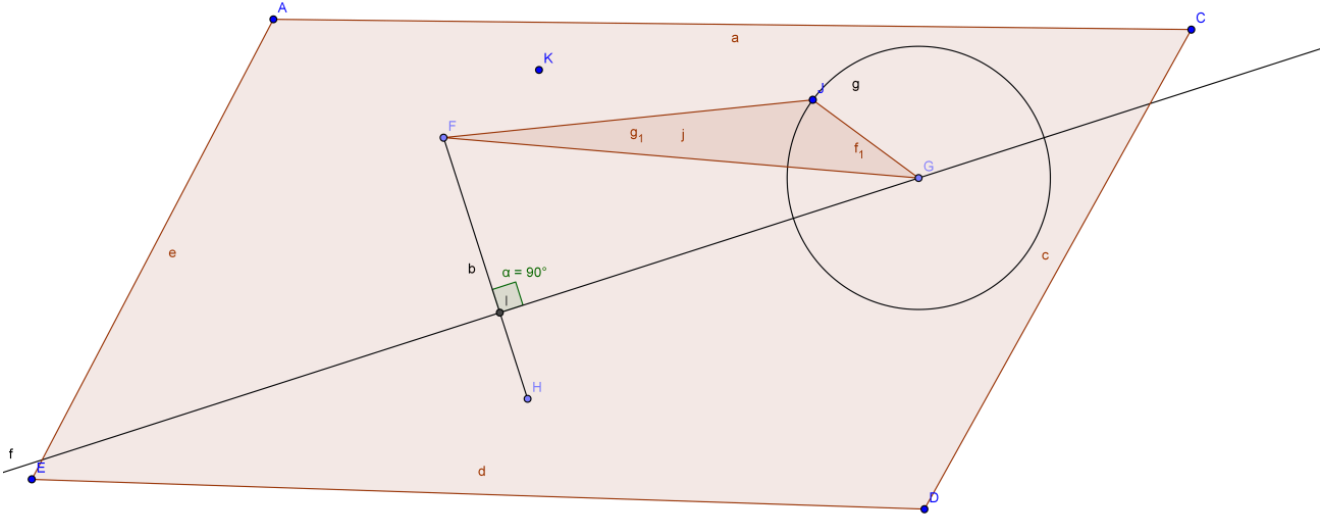

Open the Geogebra Icon on your desktop. If not there download it from the internet.

Change the View:

View, Layout, circle/triangle,

Get rid of the axis

Create the diagram below.

Next, create a diagram that has at least the following properties in some unique design.

- 5 points
- 2 lines
- 1 ray
- 2 circles
- 2 triangles
- 1 right angle
- 1 midpoint
- 1 90 degree angle
- 2 obtuse angles
- Parallel segments

You can include more than this.

Once finished open a word document and export the image to the clipboard and paste to the document.  
Put your name on the paper, print and turn in.
