

May 2020 Social Emotional Virtual Learning

ECSE/Program

Memory

Learning Target:

Students will practice remembering.

Our memory needs practice and exercise like our muscles.

Memory Game 1: What is missing?

You will need small items like a rock, toy, ball, egg, etc.

Directions for grown-up:

Place 3-5 items on the table or floor. Have the child look at the items.

Cover the items and have the child close their eyes or look away. Remove one item from the group.

Ask the child to look again and tell you which item is missing.

Memory Game 2: Match

Directions for grown-up: Print or draw pairs of shapes on small pieces of paper. You could also write pairs of letters or numbers.

Directions: Start with 3 pairs with the shape side down.

Directions: Take turns turning over two of the cards.
Practice naming the color or shape you see. Say “Remember where the [color, shape] is.”

Turn 1

Turn 2

Directions: When a player turns over matching shapes, they keep the cards! Add more cards to the game if you need more challenge.
