Sense of Sound

April 10, 2020

Early Ed Science

Lesson: 4/10/2020

Learning Target:

Students will use their sense of hearing to identify sounds in the environment.

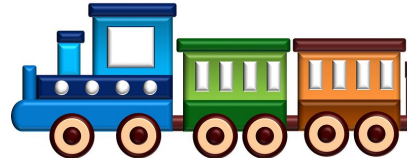

Let's Get Started:

Watch Video: [Guess that Sound](#)

Practice:

Point to each item and make the sound the item would make.

Ex: Car says “Vroooommm”

Activity:

What Can That Sound Be?

Materials needed: Paper, Pencil

1. Sing to the tune of “Oh, Dear! What Can the Matter Be?” ([Ex: Tune](#))
“Oh, dear! What can that sound be?”
“Oh, dear! What can that sound be?”
“Oh dear! What can that sound be?”
“Let’s listen closely and hear.”
2. Encourage children to listen very closely and identify any sounds they may hear. Do you hear voices in the kitchen, dogs barking, cars in the neighborhood, siblings laughing etc.
3. For children who are still working on their language skills, name and describe the word/sound to them.
4. Invite your 2 year old friends to draw a picture of what they are hearing.

Watch video: [Draw What You Hear](#)

Another way to play:

Another way to play is doing animal sounds with songs and masks. Use the classic animal song that toddlers love--*Old Macdonald*. It has a great tune and animal sounds and kids love it because it is repetitive--have them sing-a-long and then make a mask of their favorite animal!
