# Activity:

## Counting and Sharing

**Materials needed:** 2 containers, Small pile of objects from around the house

1. Give your child a pile of objects
2. Ask your child to share them with you by dividing them into two small containers.
3. Take one object and put it in your container and one object into their container and say
  - a. I have 1, you have 1.
  - b. I have 2, you have 2
  - c. I have 3, you have 3
4. Have your child continue placing items evenly in the containers and help them count (ex. I have 4, you have 4. I have 5, you have 5, etc...)

Watch Video: [Sharing Cookies](#)

## Extension:

Another way to play is during meal time, encourage your child to count as they scoop their food. Then your child could share by passing the bowl to another person at the table. Encourage your child to count with that person as they scoop the food and put it on their plate.
