Sorting

April 15, 2020

Pre-K Math
Lesson: 04/15/2020

Learning Target:

Students will sort objects into two or more groups and then re-sort.

Let's Get Started:

Watch Videos: [Sorting Objects into Three Groups](#)

Practice:

How are these toys the same? How are these toys different?

Activity:

Secret Sorting Rule

Materials needed: Several items that are different (cars, blocks, silverware, coins, pencils, etc.)

1. Sort the items you collected into 3 groups. (Size, color, shape, weight, use, etc...)
2. Ask your child:
 - a. How did I sort these items?
 - b. How are the items in these pile the same?
 - c. How are the piles different?
3. Using the same items, re-sort based on a different characteristic.
4. Repeat step 2.
5. Have your child re-sort the same items using different characteristics.
6. Ask your child:
 - a. How are the items in this pile the same?
 - b. How did you sort all these items?
