Living Things: Worms

April 21, 2020

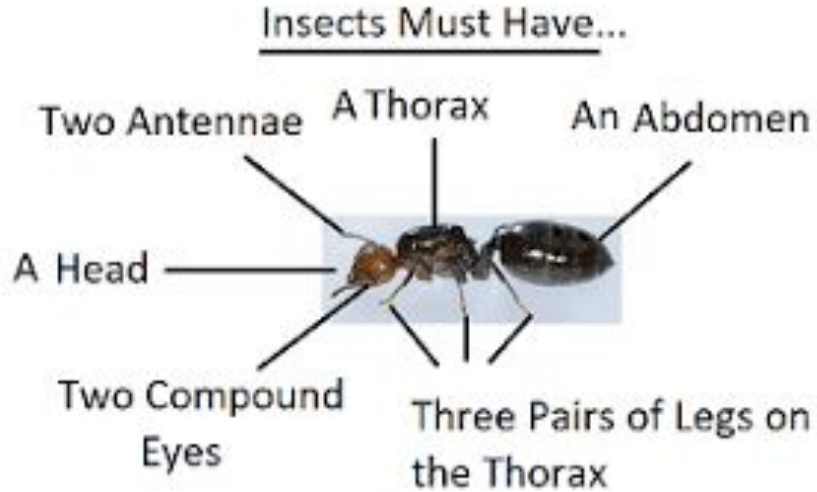

Pre-K Science
Lesson: 04/21/2020

Learning Target:
Students will identify what worms need.

Let's Get Started:
Watch Video: [Earthworms](#)

Practice:

Is a Worm an Insect?

A Worm is NOT an Insect

Activity:

What worms need

Materials needed: glass jar/vase, dirt, sand, worms, one piece of black construction paper

1. Make a worm habitat using a glass jar/vase
 - a. Place plastic wrapped cardboard tube in the middle
 - b. Alternate layers of sand and dirt
 - c. Add some worms from outside
 - d. Add food for worms (bits of vegetables)
 - e. Mist tower every few days to keep soil damp
 - f. Wrap a black piece of construction paper around the vase to keep it dark
2. You can remove it periodically to view worms.
3. Ask your child:
 - a. What do worms need? (food, water/damp, dark)
 - b. What do you notice?

Watch this video, [Worms Are Wonderful](#), for more worm information. Over the next couple days, observe how the worms behave.
