Bean Growing Follow Up

April 24, 2020

Pre-K Science
Lesson: 04/24/2020

Learning Target:

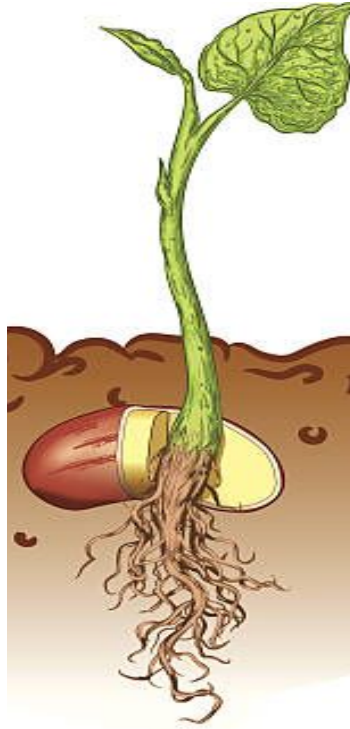

Students will include details when recording observations.

Let's Get Started:

Watch Video: [Seed Germination Animation](#)

Practice:

Describe the different parts of the bean plant.

Activity:

Bean Plant Observation

Materials needed: Bean plant bag from seed germinating activity, paper, drawing tools

1. Have your child observe their bean plant and talk about what they see.
2. Ask your child:
 - a. How has the plant changed?
 - b. Why do you think it's changed?
3. Have your child draw a picture of what they see.

Watch Video: [Observational Drawing](#)

Another way to explore is to gently take the bean plant out of the Ziploc bag and plant in a clear cup or jar. This will allow them to continue their observations!
