Early Education Patterns

April 24, 2020

Pre-K Math
Lesson: 04/24/2020

Learning Target:
Students will create a complex pattern.

Let's Get Started:
Watch Video: [Patty Shukla's Patterns Song](#)

Practice:

Look at the pattern. What comes next?

Activity:

Create your own nature pattern.

Materials needed: Objects from outside (several of each)- flowers, rocks, leaves, sticks, pinecones, acorns, grass blades, etc.

1. Have your child pick 3 different objects.
2. See if your child can make a repeating pattern on their own.

Another way to create patterns is using objects that are different sizes: small, medium, large, repeat. You can also use movements: clamp, stomp, snap, clap, stomp, snap...
