5 Senses

May 05, 2020

Pre-K Science

Lesson: 05/05/2020

Learning Target:

Students will use their five senses to explore nature.

Let's Get Started:

Watch Video: [Five Senses Song](#)

Practice:

We all have 5 senses that our body uses to explore things.

Sight: We use our eyes to look at things.

Sound: We use our ears to hear noises.

Smell: We use our nose to smell.

Taste: We use our mouth and tongue to taste.

Touch: We use our hands and skin to touch and feel things.

Activity:

Five Senses Nature Scavenger Hunt

Materials Needed: Five Senses Scavenger Hunt Page, pencil

1. Click here: [Scavenger Hunt Checklist](#)
2. Go on a walk and have your child fill out the checklist.

Another way to explore is to see what other things you can find on your nature walk and decide which of the five senses it would fit under.
