Math Operations

May 08, 2020

Pre-K Math

Lesson: 05/08/2020

Learning Target:

Students will say the new total after one is added or taken away from a group of two or three.

Let's Get Started:

Watch Video: [5 Little Ducks](#)

Activity:

Card Counting

Materials needed: Deck of cards, small toys such as beads, buttons or marbles

1. Use only card numbers 2-5 and place them upside in a pile.
2. Count out 5 toys for each of you.
3. Take turns drawing a card:
 - a. **BLACK** cards you **ADD** that number of toys to your pile
 - b. **RED** cards you **TAKE** that many from your pile
4. Take turns until all the cards are gone.

Another way to play is to add higher number cards to the playing deck so your child can add and subtract more numbers.
