3rd Grade

April 8, 2020

3rd Grade Math Lesson: April 8, 2020

Learning Target: I can change whole numbers within 100,000 into written form.

Background: This is a review lesson from 3rd grade first quarter

- Students learn to identify numbers to the nearest 10,000 in second grade.
- Students learn to identify numbers to the nearest 100,000 in 3rd grade.
- Let's Get Started:

Watch Videos:

- <u>Khan Academy: Writing Numbers in Words and Standard</u>
 <u>Form</u>
- <u>GeoGebra: You can test your skills and see what you</u>
 <u>remember by clicking here!</u>

Move this rectangle to check your answer.

Practice #2: What is 6,330 in written form?

thousands	hundreds	tens	ones
		2	

Look in the arrows for hints!

You can use a place value chart like this one to help you.

6,000 + 300 + 30

You can think about the number in expanded form to help you too.

Move this rectangle to check your answer.

Practice #3: What is 10,031 is written form?

Move this rectangle to check your answer.

MORE Practice on your own: Go to this website: The Grapes of Math By: Greg Tang

Listen to the read aloud. As you listen try to solve the riddles and then write them in written form.

MORE Practice on your own:

This worksheet will not be in your packet, but please use it if you would like extra practice.

Extra Practice:

This will NOT be in your packet.

Write each number in word form.

Self Check: Go tell someone in your home your answers.

- 1. Was this lesson?
 - easy,
 just right
 hard
- 2. Every time you see or hear a number try to spell it out loud, write it in the air using your finger, or write it down.
