

## 6th Grade Science Day 18

### Directions:

This video link will take you to Steve Spangler's site and show you 10 simple "[Egg-speriments](#)" you can do at home. (Don't do any of these experiments without getting permission). Explain in one sentence how each of these events are occurring. Make sure you are asking yourself why these things are happening. Come back to school and share with the class what you have done/learned.
