

6th Grade Science Day 6

Directions:

Before watching the [Bill Nye Electricity](#) list 3 things you already know about electricity on paper. While watching, write 3 things you learned, 2 things you want to know more about, and 1 thing you still have questions about.

After reading the [article](#) answers these two questions on paper:

1. Why does electricity make your hair stand up?
2. Why is static electricity more noticeable in winter months?
