

7th Grade Science Day 4

After this lesson you should be able to explain what humidity is and how it is measured.

Directions:

1. Record the weather each day using the document template provided on your own sheet of paper. Only record Temperature, Total Precipitation, Humidity, and Wind Speed. Do not do the questions on page 2.
The link is under the link "[This Week's Weather](#)"
2. Before watching the video. List out what you already know about humidity.
3. Watch the included [video](#) link covering humidity.
4. Write a 3-5 sentence summary on a piece of paper of what you watched and discuss this video with someone at your home.
