

7th Grade Science Day 8

Students should be able to identify the different layers of the atmosphere based on their characteristics.

Directions

1. Record the weather each day using the document template provided on your own sheet of paper. Only record Temperature, Total Precipitation, Humidity, and Wind Speed. Do not do the questions on page 2. The link is under the link "[This Week's Weather](#)"
2. Without looking at any notes, draw a diagram of the layers of Earth's atmosphere. Label each of the layers of the atmosphere beginning from the earth's surface.
3. Next, watch the [Video](#) over the Layers of the Atmosphere. Write down 2 facts about each layer within this diagram.
