GRAPHING LINES IN STANDARD FORM

With Mr. Höehn

Essential Question:

How can I graph lines in standard form?

BELL RINGER

On a sheet of paper, graph $5x + 2y = 10$.

BELL RINGER → Answer Key

Graph $5x + 2y = 10$.

SOLUTION

STEP 1

The equation is already in standard form.

STEP 2

Identify the x -intercept.

$$5x + 2(0) = 10$$

$$x = 2$$

Let $y = 0$.

Solve for x .

The x -intercept is 2. So, plot the point $(2, 0)$.

BELL RINGER → Answer Key

STEP 3

Identify the y -intercept.

$$5(0) + 2y = 10$$

Let $y = 0$.

$$y = 5$$

Solve for y .

The y -intercept is 5. So, plot the point $(0, 5)$.

STEP 4

Draw a line through the two points.

Click the two videos learn more about changing an equation to slope intercept form and graphing.
