

ISD Virtual Learning

Psychology: Psychological Disorder Research Project -

Step 5

May 8, 2020

Psychology - Psychological Disorders Research Project

Lesson 35: May 8, 2020

Objective/Learning Target:

The student will be research a Psychological Disorder examining the history, causes, symptoms, and treatments for the disorder.

Psychological Disorder Research Project - Step 5

This week, you are going to have the opportunity to learn more about a particular disorder of your choosing and create a PowerPoint or Google Slide presentation over it.

Each day's lesson will ask you to research specific aspects of the disorder that you have selected. There will be guiding questions aid you in your research. There will also be an example each day for you to follow along with for guidance.

Today's goal will be for you to finish the final product for this project and that would be some sort of presentation using Google Slides, PowerPoint, Prezi, etc. The following slide will detail some guidelines for this part.

Presentation Guidelines

1. If you wanted to have a timeframe, shoot for 5-7 minutes.
2. Your presentation should be accurate and complete, without being too long. Limit yourself to no more than 10 slides. Use bullets, not long text.
3. Slides should be attractive, creative, easy to read, and interesting. All text should be your own words, not copied and pasted.
4. This should be a scholarly pursuit of knowledge. You need at least three (3) sources.
5. Be consistent with your slides (formatting, fonts, designs, etc.) should be the same on all slides.
6. If you use any links (video, article, etc.), make sure they work.
7. The last slide should be a Works Cited Slide using MLA Format. ([For help with this, click on the link.](#))

Research Tips/Sources

You will need to have at least 3 different sources which will be listed on your project as a Works Cited slide. Because of this, it will be important for you to keep track of your information and where you got it from.

Please refrain from using Wikipedia as 1 of your different sources!

Examples of good resources:

[Crash Course Psychology](#) (videos)

[Khan Academy](#) (videos)

[Mayo Clinic](#) (hospital website; use search tool to find info)

[Very Well Mind: Mental Health A-Z](#) (page includes links to dozens of different disorders)

These are just a handful of the many great resources out there on disorders. Feel free to use ones not listed!

End of Project Day 5 - Looking Back & Looking Ahead

By now, here's what you should have discovered:

- Name of the disorder
- History
- Causes
- Symptoms
- Treatments
- Miscellaneous Information

If you'd like to see a sample of a similar research project, look at the next slides!

Congratulations on finishing your research and your project for Psychology. If you would like to share your finished product, feel free to share or email philip_courter@isdschools.org. It will get looked at and feedback will be given back to you.
