Date: April 7th

Lesson 12

Learning Target:

Impact of the Israel-Palestine Conflict

Warm-Up

Let's Get Started:

1. What impacts could a long term war have?
2. How can a previous war lead to another conflict?
3. How can a small scale war escalate to a bigger one?

Picture Questions

1. Make a list of things that could be affected by the destruction in this picture.
2. How long do you anticipate it would take to rebuild this area in Palestine?

Practice:

The Israel-Palestine conflict dates back to after World War II. Throughout the years since 1946 Palestine has seen a huge land loss. Now it is to the point, where Israel has the power to control Palestine. The main source of conflict in this war is a religious dispute.

1. Take a look at the image on the following slide
2. Study the Picture
3. On the following slide, answer and think about the questions involving the picture

PALESTINIAN LOSS OF LAND 1946 TO 2014

Questions

1. What country has lost the most land?
2. Why do you think that Israel has continued to grow since 1946?
3. What region of the map do you think has been the most heavily contested region? Why?

Answer Key

1. Palestine
2. They have continued to get the support of other nations in the battle against Palestine, thus, giving them a huge advantage against Palestine.
3. The Gaza Strip on the Southwest edge of the map has been the most heavily contested area. Gaza has importance to Palestine.

Additional Resource/Practice

Click on the following link to a crash course over the conflict

[Israeli/Palestine Conflict](#)

Write a paragraph that describes the history of the conflict and how the conflict has escalated since the year 2000.
