# Geography

## Lesson 24: April 24, 2020

**Objective/Learning Target: Negative impacts of Globalization**

# Warm Up

## Warm-up questions

1. What areas are more heavily globalized?
2. What areas are the least globalized?
3. Why do you think some areas are more globalized than others?

## Warm-up answers

1. North America, Europe, and Australia
2. Africa
3. Answers will vary: It typically depends on the available resources and if the countries are developed or underdeveloped

# Lesson Activity

Globalization is the process where businesses operate internationally. Example: Mcdonalds in China.

1. Today we will look at different documents over Globalization
2. These documents will focus on the negative sides of Globalization
3. Answer the questions on the following slides regarding the pictures

## Practice Questions

1. What is happening in the picture?
2. After looking at this picture, what is a negative impact of globalization?
3. Why do you think the trash is like this?

## Practice Answers

1. Trash piling up on a beach
2. Pollution
3. Globalization causes many areas of the world to produce a lot. This makes trade go up, and thus the opportunity for trash and pollution rises.

## Practice Questions

1. What is happening in this picture?
2. After looking at this picture, what is a negative impact of globalization?
3. How does this involve globalization?

## Practice answers

1. Workers working on products in a factory
2. Unfair labor practices
3. Many countries employ underdeveloped countries to work for cheap on their products, so they can ship them across the world.

# Reflection

After looking at two pictures of the negative impacts of globalization:

What do you think is the bigger problem? Why?
