

## Advanced Photography / Kathryn Messick / April 8, 2020

### Lesson Name: STREET PHOTOGRAPHY

**Objective:** To practice being a street photographer (or neighborhood photographer), using your cellphone camera/or picture taking device. You may edit your image on the default edit on your device or in an app program-whatever you have access to at this time. Time 15-30 min

**Requirements:** Camera or Cellphone

**Bell Ringer:** Will you try street photography or do neighborhoods around you work better?

**Objective:** To practice being a street photographer (or neighborhood photographer), using your cellphone camera/or picture taking device. You may edit your images on your device or in an app program (whatever you have access to at this time) Time 15-30 min

**Supplies:** Cellphone or Camera

#### THINGS TO CONSIDER BEFORE YOU BEGIN:

- Are the people around you ok with being photographed?
- Maintain social distance when around those not your family
- What time of day is it? Will there be something going on when you are ready?
- Is the weather cooperating? Is rain really a problem? Can you make it work?

#### Task #1:

Begin taking photographs of what is happening around you that you think might make an interesting shot. Change your angle several times. Does it fit the definition of street/neighborhood photography that you have previously researched? Why or why not? Reshoot as needed.

**Task #2:** Edit your favorite photo and publish/put on your favorite social media platform.
