

Basic Photography

Composition Challenge - High Contrast

May 6th, 2020

This activity is an opportunity to continue improving your picture-taking skills by taking photos at home.

Going outside is also a great option to add variety to your work, just be careful; if you decide to go to a public location such as a neighborhood park, **follow all rules and remember what is being advised by officials in an effort to help stop the spread of the Covid-19 virus.**

Your safety and health are priority number one!

The challenge for each day will be taking a few interesting photos using a compositional concept that was previously learned in class. Each day for the week will focus on a different subject matter but the compositional guideline will stay the same.

If you don't have a digital camera, feel free to use your phone camera!

*Composition concepts are the same no matter how the images are captured.

Things to keep in mind: Available light, contrast, an interesting subject, and of course the compositional guideline (concept). Also, it's a good idea to use the Rule of Thirds in combination with any other concept you're photographing.

Bell Ringer: What kind of mood do high contrast photos evoke?

This weeks compositional technique to focus on is High Contrast

High Contrast-- Shooting an image that shows a strong difference between Highlights and shadows. Or a strong difference between bright colors and dark colors.

How to take a shot with High Contrast in it:

High Contrast photos require you to look for strong differences of lighting or colors. Think about placing your subject near strong shadows casted by the light of a window or lamp. Or find places that have strong contrasting dark and light colors.

Practice May 6th, 2020

High Contrast photos of objects found in your room.

- Take three different, original and interesting photos with your subject being objects found in your room..
