## Intro to Visual Arts / May 7, 2020

### Lesson Name: Non-Objective vs. Abstract

**Objective:** Student will create their own abstract artwork by simplifying, cropping, and enlarging a found image.

**Requirements:** pencil, paper, colored pencils and/or crayons, ruler, plate or lid, magazines, newspaper, mail/grocery ad

**Bell Ringer:** Watch the Following YouTube video: <https://youtu.be/3kdzGAjG26s> What is Abstract Art?

Watch the Following YouTube Tutorial on making a viewfinder: <https://youtu.be/oo3AKfMZi-Y>

Watch the Following YouTube Tutorial on created the project: <https://youtu.be/SfA3nfjuWOW>

#### Tasks:

1. Create a viewfinder by cutting a 1 inch square or circle into a piece of paper. Watch the video above if needed.
2. Watch the project video above or follow these directions.
  - Using the viewfinder and a magazine, book, or advertisement find an interesting composition. When you have found your image, cut it out and glue it to the back of the viewfinder so you can see your image you want to recreate.
  - On your paper, create a larger circle or square (depends on what shape you used for our viewfinder). You can use a plate or lid for the circle and a ruler or straight edge to make a square.
  - Begin drawing in your image. Remember your image in the viewfinder is small, you need to enlarge it to fit on your paper. You can simplify the image, or take out areas you don't want to include. Take note of the type of shapes you are creating while you draw your image. Are they geometric shapes or organic shapes?
  - When you are done drawing, using your coloring utensil choice and color it in, work on the values you see in the image. You can change the colors of areas if you would like, remember this is an Abstract Art project, you are just getting your inspiration from the real image. You can also combine colors if needed to make a color you want or need by coloring one color over the other.
