

## Sculpting 1

Unit Name: Origami

Date: 4/17/2020

Mr. Bertoncin, Mrs. Flinton, Mrs. Manco

**Objective:** Use paper as a constructive medium to build a bowl and find ways to decorate it.

**Requirements:** Paint, ribbon, yarn, glitter, coffee, tea, or other materials to decorate the surface of the bowl.

**Bell Ringer:** Will the inside and the outside of the bowl be treated differently? Do you have plans for the bowl you created (these aren't meant for food, they are simply decorative).

### Lesson/Activity:

1. Use whatever materials you have chosen to decorate the bowl. You may also choose to attach items to the surface of the bowl (glue or a glue/water mix work well for this).
2. You may choose to seal the surface with a polyurethane, Mod Podge, or something similar. This would help protect the bowl and make it last longer.
3. Take a picture of your bowl and share it using #isddoes art.

### Resources and Supporting Materials:

[Toilet Paper](#) (this link contains text in German, but is EASY to understand, and is a simple solution)  
[easy tutorial](#) This link includes some interesting decorating ideas

### Check for Understanding:

- How does the bowl you created compare to other vessels you have at home (mixing bowls, milk cartons, frozen juice cans, tissue boxes...)?
- What can be stored in your bowl? What could not be stored in the bowl?
- If you were to create another bowl, what might you do differently?
