

Medical Terminology  
Lesson: April 7, 2020

**Learning Target:**

1. Define terms related to the heart, blood vessels, and lymphatic system.

**Let's Get Started:**

Watch Video: [How The Heart Actually Pumps Blood](#)

**Practice:  
Quiz Yourself!**

**Click on the [Quizlet](#) link and practice your terms for this week. You can work with a friend or family member if you prefer!**

**For this assignment, choose one of the 3 words listed below and write a more detailed explanation.**

**You can do the research online or at a library but please write the paragraph in your own words. It's important to write with the correct grammar, spelling and punctuation.**

Here is an example for you to follow:

**Angina pectoris: A dull pressure or pain in the center of the chest that may be accompanied by a burning sensation not unlike indigestion, and a radiating tingle down the left arm indicating that the heart muscle is not getting enough oxygen. Pain is not as severe as a heart attack and the heart muscles are not damaged. The pain will usually recede quickly if the victim stops all activity.**

**1. Embolism 2. Angiography 3. Arrhythmia**\_\_\_\_\_

**Practice:  
Read Your Work!**

**When you finish, Practice reading your written work to a friend or family member. Focus on proper pronunciation. Click [here](#) to hear the pronunciation of your medical terms**
