Medical Terminology/The Male Reproductive System

Lesson: May 13, 2020

Objective/Learning Target:

List the structures and functions of the Male Reproductive System and define medical terms related to it.

Let's Get Started:

1. List as many of the structures of the male reproductive system you can think of. (there are 10)
2. What are the 3 functions of the male reproductive system?

Let's Get Started: Answer Key

Answers to number 1

1. penis
2. testes
3. sperm
4. scrotum
5. bulbourethral glands
6. prostate gland
7. seminal vesicles
8. semen
9. epididymis
10. testosterone

Let's Get Started: Answer Key (continued)

Answers to number 2

1. Producing the hormone testosterone
2. Producing and storing the male reproductive cells called spermatozoa (sperm)
3. Producing, transporting, and releasing semen

Practice:

1. Pertaining to the prostate _____
2. Pertaining to a testicle _____
3. Pertaining to the epididymis _____
4. Pertaining to sperm _____
5. Pertaining to the glans penis _____

Practice: Answer Key

1. Prostatic
2. Testicular
3. Epididymal
4. Spermatic
5. Balanic

More Practice:

Use this [Quizlet](#) to help learn more terms and locations in the body of the Male Reproductive System.

Additional terms can be studied through this [Quizlet](#), as well.

Practice Continues:

Case 14-1

Mr. Kendall was seen in the office because of a lump he discovered in his testes when he performed a testicular self-examination. He was concerned about the possibility of having testicular cancer. He denied having any balanorrhea. Examination revealed a circumcised male with an enlargement in the scrotum consistent with a varicocele.

Read the report and answer the multiple choice questions on the next 3 slides.

Practice: Multiple Choice Questions

1. The term that means abnormal discharge from the glans penis is
 - A. semen
 - B. testosterone
 - C. prostaticorrhea
 - D. balanorrhea

Practice: Multiple Choice Questions (continued)

2. The term that means enlargement of veins in the spermatic cord is
 - A. Spermatocele
 - B. Varicocele
 - C. Hydrocele
 - D. Cystocele

Practice: Multiple Choice Questions (continued)

3. The term that refers to the sac that contains the testes is
- A. Testicular
 - B. Varicocele
 - C. Scrotum
 - D. Circumcised

Practice: **Answer Key for Multiple Choice Questions**
For **Case 14-1**

1. The term that means abnormal discharge from the glans penis is
 - A. semen
 - B. testosterone
 - C. prostatorrhea
 - D. balanorrhea**

Practice: **Answer Key for Multiple Choice Questions**
For **Case 14-1**

2. The term that means enlargement of veins in the spermatic cord is
- A. Spermatocele
 - B. Varicocele**
 - C. Hydrocele
 - D. Cystocele

Practice: **Answer Key for Multiple Choice Questions**
For **Case 14-1**

3. The term that refers to the sac that contains the testes is
- A. Testicular
 - B. Varicocele
 - C. Scrotum**
 - D. Circumcised

Practice Continues:

Case 14-2

Mr. Glower was seen in the office today for consideration of a vasovasostomy. He underwent a vasectomy five years ago. He had a history of STD. Findings of genital examination today were significant for a single condylomatous lesion on the penis as well as for phimosis. After discussion of the risks and benefits of surgery, he has decided to go ahead with it. The procedure has been scheduled for next week.

Read the report and answer the multiple choice questions on the following 3 slides.

Practice: Multiple Choice Questions

1. The term that involves creating a new opening between two severed pieces of vas deferens is
 - A. Vasectomy
 - B. Vasovasostomy
 - C. Phimosis
 - D. Balanoplasty

Practice: Multiple Choice Questions

2. The condyloma on the patient's penis could be described as a (an)
- A. Blister or ulcerative lesion
 - B. Enlargement of the veins
 - C. Agent that kills sperm
 - D. Wart-like lesion

Practice: Multiple Choice Questions

3. The term phimosis means there is a(n)
 - A. Narrowing of the prepuce
 - B. Enlargement of the penis
 - C. Enlargement of the veins in the spermatic cord
 - D. Accumulation of fluid in the scrotum

Practice: **Answer Key for Multiple Choice Questions**
For **Case 14-2**

1. The term that involves creating a new opening between two severed pieces of vas deferens is
 - A. Vasectomy
 - B. Vasovasostomy**
 - C. Phimosis
 - D. Balanoplasty

Practice: **Answer Key for Multiple Choice Questions**
For **Case 14-2**

2. The condyloma on the patient's penis could be described as a (an)
- A. Blister or ulcerative lesion
 - B. Enlargement of the veins
 - C. Agent that kills sperm
 - D. Wart-like lesion**

Practice: **Answer Key for Multiple Choice Questions**
For **Case 14-2**

3. The term phimosis means there is a(n)
- A. Narrowing of the prepuce**
 - B. Enlargement of the penis
 - C. Enlargement of the veins in the spermatic cord
 - D. Accumulation of fluid in the scrotum
