

Acting 1 & 2 (Introductory Acting)
Characterization/Personal Monologue
Ms. Hayes, Mr. Meyer, Ms. Yung
April 6, 2020

Daily Objective:

- Students will use theatre to discuss and explore how they and others are feeling during current times.
- Students will develop a Venn Diagram to compare the differences and similarities to human reactions during our current times.

Bell Ringer/Let's Get Started:

- Consider the following and discuss with someone in your home or through electronic communication: How has the CoVid19 Pandemic changed your behaviors?

Lesson/Activity:

- Today, we will explore a character's history or backstory. Remember that a person's current state of being and their actions are determined by all of the experiences. So a character's past/their story dictates their reactions to a situation.
- Let us consider how Covid19 is affecting how we go about our daily lives? Think about how the different people in your household are reacting to the situation? How are your different friends reacting to the situation? Why are we reacting to it differently?

Practice:

- TASK: Choose one person in your life that you have stayed connected with during our Covid19 Social Distancing. Make a Venn Diagram to compare similarities and differences of how you have reacted/adapted to our new state of normal.
