HS Computer Science Essentials

Lesson: May 1, 2020

Objective/Learning Target:
Python While Loops

Let's Get Started:

Python has two primitive loop commands: while loops and for loops. With the while loop we can execute a set of statements as long as a condition is true.

Explore the Python tutorial at:

https://www.w3schools.com/python/python_while_loops.asp

Work through the Python While Loops subcategory.

Be certain to try each example
that is provided

Learning by Examples

With our "Try it Yourself" editor, you can edit the code and view the result.

Example

```
print("Hello, World!")
```

Try it Yourself >

Click on the "Try it Yourself" button to see how it works.

Clicking on the "Try it Yourself" buttons will open a new screen that will allow you to practice what you have learned in the tutorial. The screen on the left will allow you to enter your code. Click on "Run" to see the output of your program on the right side of the screen.

#This is a comment.
print("Hello, World!")

Hello, World!

Practice:

At the end of this section, click on the “Start the Exercise” link within the “Test Yourself With Exercises” block.

Python Exercises

Test Yourself With Exercises

Exercise:

Insert the missing part of the code below to output "Hello World".

```
_____ ("Hello World")
```
