# HS Computer Science Essentials

## Lesson: April 27, 2020

**Objective/Learning Target:**  
Python Dictionaries 1 of 2

## Let's Get Started:

A dictionary is a collection which is unordered, changeable and indexed. In Python dictionaries are written with curly brackets, and they have keys and values. Explore the Python tutorial at:

[https://www.w3schools.com/python/python\\_dictionaries.asp](https://www.w3schools.com/python/python_dictionaries.asp)

Work through the Python Dictionaries subcategory.

## Python Tutorial

[← Home](#)

Python is a programming language.

Python can be used on a server to create web applications.

[Start learning Python now »](#)

Be certain to try each example  
that is provided

## Learning by Examples

With our "Try it Yourself" editor, you can edit the code and view the result.

Example

```
print("Hello, World!")
```

Try it Yourself >

Click on the "Try it Yourself" button to see how it works.

Clicking on the "Try it Yourself" buttons will open a new screen that will allow you to practice what you have learned in the tutorial. The screen on the left will allow you to enter your code. Click on "Run" to see the output of your program on the right side of the screen.

#This is a comment.  
print("Hello, World!")

Hello, World!

## Practice:

At the end of this section, click on the “Start the Exercise” link within the “Test Yourself With Exercises” block.

## Python Exercises

### Test Yourself With Exercises

#### Exercise:

Insert the missing part of the code below to output "Hello World".

```
_____ ("Hello World")
```

Submit Answer »
