HS Computer Science Essentials

Lesson: April 23, 2020

Objective/Learning Target:
Python Tuples

Let's Get Started:

A tuple is a collection which is ordered and unchangeable. In Python tuples are written with round brackets. Explore the Python tutorial at:

https://www.w3schools.com/python/python_tuples.asp

Work through the Python Tuples subcategory.

Be certain to try each example
that is provided

Learning by Examples

With our "Try it Yourself" editor, you can edit the code and view the result.

Example

```
print("Hello, World!")
```

Try it Yourself >

Click on the "Try it Yourself" button to see how it works.

Clicking on the "Try it Yourself" buttons will open a new screen that will allow you to practice what you have learned in the tutorial. The screen on the left will allow you to enter your code. Click on "Run" to see the output of your program on the right side of the screen.

The screenshot shows a code editor interface. At the top, there is a navigation bar with icons for home, menu, clipboard, and moon, followed by a green "Run >" button. Below the navigation bar, the code editor contains the following text:

```
#This is a comment.  
print("Hello, World!")
```

On the right side of the editor, there is a black box displaying the output of the code: "Hello, World!"

Practice:

At the end of this section, click on the “Start the Exercise” link within the “Test Yourself With Exercises” block.

Complete Exercises 1-4 under PYTHON Tuples and check your answers after running your programs.

Python Exercises

Test Yourself With Exercises

Exercise:

Insert the missing part of the code below to output "Hello World".

```
_____ ("Hello World")
```
