

Computer Networking Virtual Learning

ITE - Review Chapter 7

May 22nd, 2020

Lesson: 5/22/2020

Objective/Learning Target:

- Review important topics from Chapter 7

Focus Questions

- What type of device is required to create an infrastructure wireless network configuration?
- What is the purpose of an SSID?
- Which wireless standards are typically backwards compatible with 802.11g?
- Two access points are part of the same wireless network. Should they use the same channel, or a different channel? Why?
- How does MIMO differ from channel bonding?
- What happens to the speed of a wireless connection as you move away from the access point?

Learning Tasks

- Navigate to TestOut.com & log on using your credentials
- Navigate to PC Pro Chapter 7 - Wireless Networking

Find the information that you believe you need to review or touch base on from this chapter.

It has been since the beginning of the year since we have been over this information.

- Review Vocabulary words for Chapter 7 at the beginning of each section
- Read Fact Sheets located in each section within Chapter 7
- Watch videos located within each section within Chapter 7
- Answer/Review Practice Questions located within Chapter 7

Time Breakdown

Time may vary between student depending on how much review they need to do:

Videos = 30 Minutes

Fact Sheets = 30 minutes

Practice Questions = 30 minutes

Total Time = 90 minutes
