Vex VR Coding Find Your Age

May 4, 2020

Engineering Lesson: **5/4/2020**

You must have finished the activity for 4-29 to complete this lesson.

Objective/Learning Target:

- **Decompose (break down) problems into smaller, manageable sub problems to facilitate the program development process.**
- **Test and debug (identify and fix errors) a program or algorithm to ensure it runs as intended.**

Review of how to access
[Click on this Link to access VEX VR](#)

Click Tutorials at the top left of the screen. Click getting started and watch all three videos.

After the videos you make your robot move, play with the environment.

Review each of the resources provided to the right to gain a better understanding of the VEX VR Environment.

[New Resource link HERE](#)
click tutorials at the top.

- [How to Launch - VEX code VR](#)
- [How to Create a Project - VEXcode VR](#)
- [How to Start and Stop a Project - VEXcode VR](#)
- [How to Select a Playground - VEXcode VR](#)
- [How to Access Help - VEXcode VR](#)
- How to Open a Project
([macOS](#), [iPad](#), [Chromebook](#), [Windows](#), [Android](#)) - VEXcode VR
