

**Fashion I**

**HS/Finding fabrics in your  
own closet.**

**April 21, 2020**

## HS/Fashion Lesson:

**Objective/Learning Target: Students will be able to determine what fabric they have in their own closet by looking at their own clothing.**

**Learning Standard: 16.3.1**

# Instructions

Go through your closet and try to find one article of clothing from each of the fabrics you researched for your fabric book. You can then be able to identify the texture of those specific fabrics. Write a brief summary on each of the articles of clothing on a google doc. What is the texture feel like, would it be soft against your skin, and is it something you would be comfortable wearing?
