

Human Growth and Development

School Age Children

May 4, 2020

Lesson: May 4, 2020

Objective: Students will be able to explain the different developments of school age children.

Learning Target: 12.1.1

How to do assignments:

If you created a google doc last week, continue on it. If you did not, then:

- Create a google doc.
- Put today's date and the lesson topic
- Put the questions and answers under that date. (You may need to copy the questions from the lesson and paste them into your doc)

This week will be about school age children.

You need to go to the following website and use it to answer the questions on the following slide.

[School Age Children](#)

You will use the following sections: physical development, school, language development, and behavior.

1. What ages are school age children?
2. What does it say about weight for this age?
3. What age does sense of body develop?
4. How much physical activity should they get at this age?
5. Give an example of secondary sex characteristics for both boys and girls.
6. How long should a 9 year old be able to focus?
7. By age 10, how many commands can they follow in a row?
8. What type of friendship do these children typically have?
