

Human Growth Virtual Learning

Toddler Safety

April 14, 2020

Lesson: April 14, 2020

Objective: Students will be able to identify and describe safety hazards in a home.

Learning Target: 2.1.5

How to do assignments:

If you created a google doc last week, continue on it. If you did not, then:

- Create a google doc.
- Put today's date and the lesson topic
- Put the questions and answers under that date. (You may need to copy the questions from the lesson and paste them into your doc)

Yesterday, you learned about toddlers. You may want to open those notes again for today's activity.

Today, the focus will be on toddler safety.

The next slide explains the activity.

Go to the following website.

<http://staging.charlieshouse.org/safety/charlies-safety-list/>

Browse the list of home hazards for children.

On your google doc, list 10 hazards that you found on the website. Explain why that's a hazard and what a parent can do to keep their child safe.

There is an example on the next slide.

Toddler Safety in the Home

1. Hazard: Medications and Cosmetics

This is a hazard because a child can ingest harmful things.

Parents need to keep these out of reach of children and/or lock the cabinets that they are in.
