Before and after Transformations

A lot of the shows on HGTV take rooms or complete houses and make transformations. I think the first show that started this was Extreme makeover. (Which is coming back to TV.) Have you ever wondered how the decorators make it look so good?

The decorators themselves have the knowledge that we have studied. They look at the color and principles and elements of design and decided what they can do to transform the current space.

For the next two days I want you to do the same.

Following the same instructions complete another one. Before and After Design Transformations:

Directions:

Look at the before/after pictures on the following website

https://www.decorist.com/blog/our-best-before-after-transformations/ and choose two designs you love. Identify the elements/principles that the designer used well to create the final design.

Today's assignment is for you to fill out one of the following pages thinking about the different colors that designer used in the transformation.

Remember the principles for design and the elements of design and think about how the designer use them differently.

Answer the following on a seperate sheet of paper

Review:

Elements - Color, Line, Space, Texture, Form/Shape
Principle - Balance, Emphasis, Proportion/Scale, Rhythm, Unity, Variety

1. **Name of room:**

2. **What type of style does this design represent?**
