

**FACS Virtual Learning 1/2**

# **High School/Interior Design**

**May 5, 2020**

High School/Interior Design  
Lesson: [May 5, 2020]

**Objective/Learning Target:**

**11.2 Evaluate housing design concepts and theories, including sustainability and universal design, in relations to available resources and options.**

**11.2.3 Analyze the effects that the principles and elements of design have on aesthetics and function.**

## **Interior Design Upcycle Project**

With Earth being in April, I'd like to dedicate this month to lessons based on improving our earth. We are first going to start with an upcycle project. Please carefully read the directions below and follow all the steps.

What does upcycle mean?!

**Upcycling** is when you reuse (discarded objects or material) in such a way as to create a product of a higher quality or value than the original.

Resources: Read this article and view the videos to help you get inspired

## Step One: Research

Get on Pinterest and look up “upcycle” using the slideshow I have created, copy pictures of upcycle projects you’d be interested in trying to complete. Be realistic in using images of things you can actually do, skill and material wise, however, I want to see creativity. Do not simply cut the top off a water bottle and call it a vase!!

Reminder:

If you want feedback of your work make sure it is properly labeled and then put into Google Classroom
