

# Pathways to Teaching

# School District Research

May 4, 2020

Lesson: May 4, 2020

**Objective:** Students will be able to research different school districts around the metro area.

**Learning Target:** 4.2.1

## How to do assignments:

If you created a google doc last week, continue on it. If you did not, then:

- Create a google doc.
- Put today's date and the lesson topic
- Put the questions and answers under that date. (You may need to copy the questions from the lesson and paste them into your doc)

This week will be all about planning for your future career as a teacher. When you are looking for teaching jobs, you look at the different districts and figure out the ones that you want to apply at and which ones you don't.

Today, you will be looking at different school districts and comparing them using some questions on the next slide. You will search for the answers on that school district's website.

Put your answers in the google doc. for this class work.

1. What two school districts did you look at?
2. Why did you choose these two districts?
3. Describe what's on each of the district's home screens.
4. How many elementary, middle, and high schools are in their district?
5. What is the lowest and highest pay range for each district?
6. Why would someone who is applying to teaching positions want to do this for a district?
7. Did anything surprise you about what you found?
