HS Machine Drafting Design Lesson #13

April 22, 2020

Objective/Learning Target:
Students will continue to sketch
complex Isometric drawings.

Let's Get Started:

Look around your house for something that has an interesting shape. Not too hard or too easy, but something that interests you like a fishing reel or game controller. Decide which face should be the front view. This should be the longest side and show the most detail. Now get a pencil, paper and a big eraser. Try your hand at sketching an Isometric view of this complex object.

You may print and use the Isometric paper on page 5. For a challenge use the graph paper on page 6 or even plain white paper like in the videos.
