The Architect's Scale

Architectural Drafting Mr. Windes, Mr. Leutzinger, Mr. Oatman

Lesson: April 14, 2020

Objective/Learning Target:

Students will learn to accurately use an architect's scale

Bell Ringer:

Using what you learned from the previous lesson, between 1/8" = 1'-0" and 1"= 1'-0", which scale would be more appropriate to use when designing a doghouse? What about an apartment building? Justify your answers.

Let's get started:

An architect's scale is a tool that allows designers to create large scale projects such as buildings and bridges at a reduced size. A typical scale is triangular in shape and contain as many as 12 different scales on it.

Print this page at 100% scale. Use your printed scales to measure the lines using the proper scale (if you do not have an architect's scale handy).

5

Record the length in feet and inches using the $\frac{1}{4}$ " = 1'-0" scale:

5

Record the length in feet and inches using the $\frac{1}{2}$ " = 1'-0" scale.

5

Record the length in feet and inches using the $\frac{1}{8}$ " = 1'-0" scale.

5

Record the length in feet and inches using the 1" = 1'-0" scale.

Answers** for measurements:

¹ ⁄4"	Scale	1/2" Scale
1.	18'-4"	1. 9'-1 ¹ / ₂ "
2.	11'-3"	2. 5'-6 ½"
3.	14'-6"	3. 7'-3"
4.	12'-8"	4. 6'-4 ¹ / ₂ "
5.	20'-8"	5. 10'-4"
1⁄8"	Scale	1" Scale
¹ /8"	Scale 36'-8"	1" Scale 1. 4'-7"
¹ /8" 1. 2.	Scale 36'-8" 22'-6"	1" Scale 1. 4'-7" 2. 2'-9 ¾"
¹ / ₈ " 1. 2. 3.	Scale 36'-8" 22'-6" 29'-2"	1" Scale 1. 4'-7" 2. 2'-9 ¾" 3. 6'-7 ¾"
1⁄8" 1. 2. 3. 4.	Scale 36'-8" 22'-6" 29'-2" 25'-6"	1" Scale 1. 4'-7" 2. 2'-9 ³ / ₄ " 3. 6'-7 ³ / ₄ " 4. 3'-2"

Common Mistakes:

- Make sure you are reading from the correct end. Depending on the scale you are using you could either read from right to left or left to right.
- Make sure you are using the correct numbers on the scale.
- □ The larger the scale the more precise your measurements need to be (i.e. ¼s" scale measures to the nearest 2" and 1" scale measures to the nearest ¼").

**Due to the nature of printer discrepancies and interpretations of the printed scales, answers, answers are approximate.
