

Music Virtual Learning

Philharmonic Orchestra

April 20, 2020

Philharmonic Orchestra

Lesson: April 20, 2020

Objective/Learning Target: Students will be able to sit on sit bones with head balanced and free legs.

Warm-Up

Monday Motivation: What is one musical goal you can work towards this week?

Try setting a positive goal and action steps.

Example:

Negative/unclear goal: “I need to stop making mistakes
in this song.”

Positive goal: “I will work to improve my rhythm in this song.”

Action steps: Practice slowly, break down challenging rhythms, gradually
put chunks of measures back together.

INTRO TO VIBRATO

VIBRATO KILLERS

- BAD ARM POSITION
 - PIZZA WRIST
 - THUMB PLACEMENT
 - CLAMPING WITH 1ST FINGER
 - LONG NAILS!
 - ETC.

ALL WATCH THIS

VIBRATO WARM UP

ALL WATCH THIS

"SILENT SIREN"

- CURVED HAND IN BETWEEN THE STRINGS
- RUN UP AND DOWN THE STRING WITH A RELAXED MOVEMENT

- TRY "ROCKING" IN RHYTHM (8TH NOTES, 16TH NOTES, AND FASTER)

VIOLIN/VIOLA: WATCH
MS. WOW'S VIDEO!

CELLO/BASS: WATCH MS.
ROSS' VIDEO!

Lesson

Remember your head balance!

Try to remember one of the activities to find head balance

1. Grab a book and read it for just a second.
2. Now put your hand on the back of your head and lean your head into your hand.
3. Slowly take your hand away and see if you can still feel where it was.
4. Now read again.

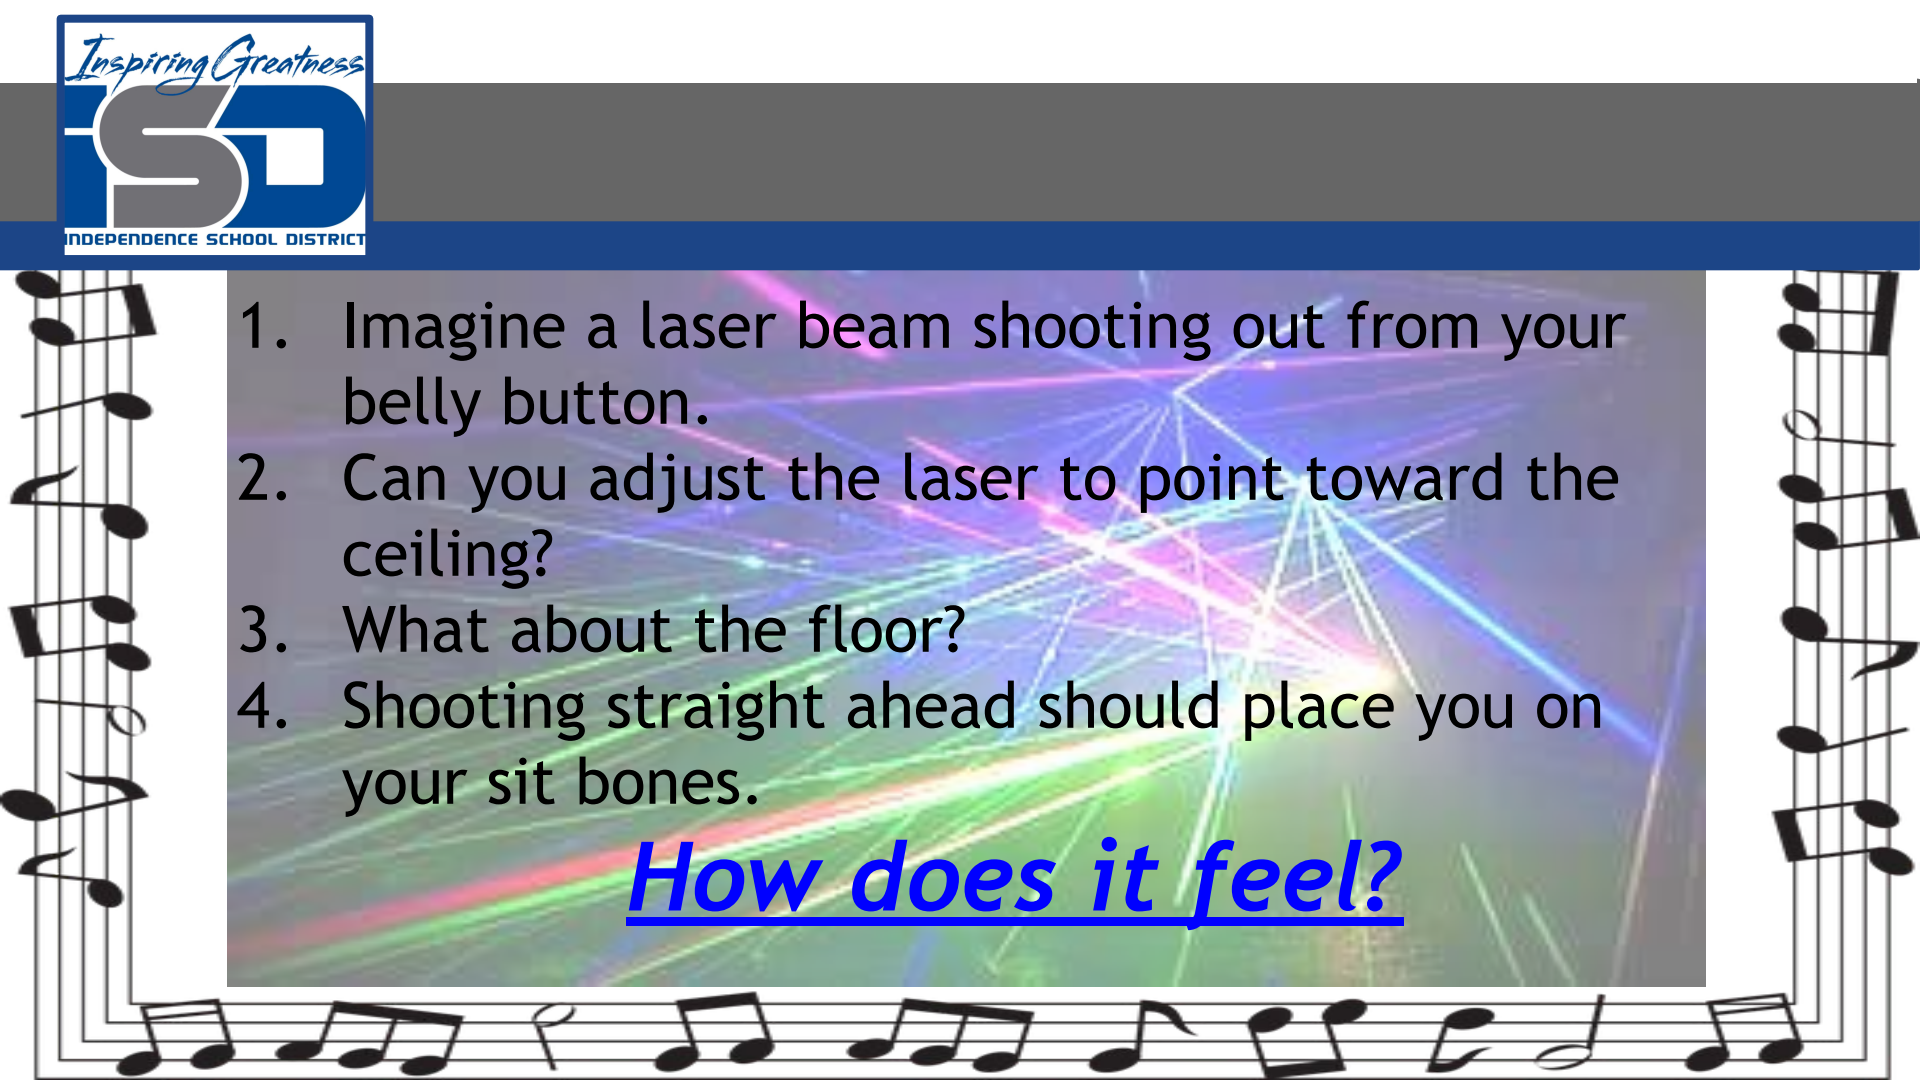

What was different?

Hopefully you had to bring your
book up a lot higher to see it!

Remember your sit bones!

Try to find your sit bones and head balance at the same time.

- 
1. Imagine a laser beam shooting out from your belly button.
 2. Can you adjust the laser to point toward the ceiling?
 3. What about the floor?
 4. Shooting straight ahead should place you on your sit bones.

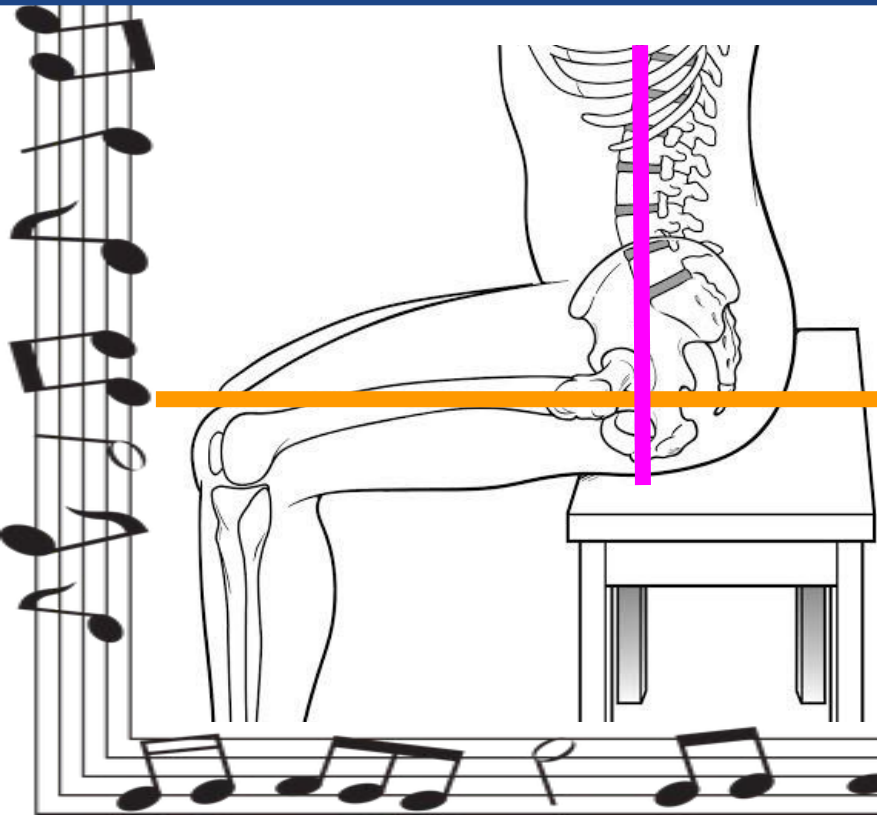

How does it feel?

While you are sitting... *sitting...*

Trace down your leg at
the bend.
Then stand up!
This is the top of your
leg!

If you sit correctly...
***Your legs should
be higher than your
sit bones!***

If your legs are sloping down...
***you may need to add
books under your feet!***

Books! Doing what they do best :)

Good Posture

Bad Posture

Can you feel some weight in your feet?

They should be holding up your legs!

© ABME ®

If you cannot feel the weight of your legs in your feet then you need height underneath them. Your legs should be parallel to the floor.

Review

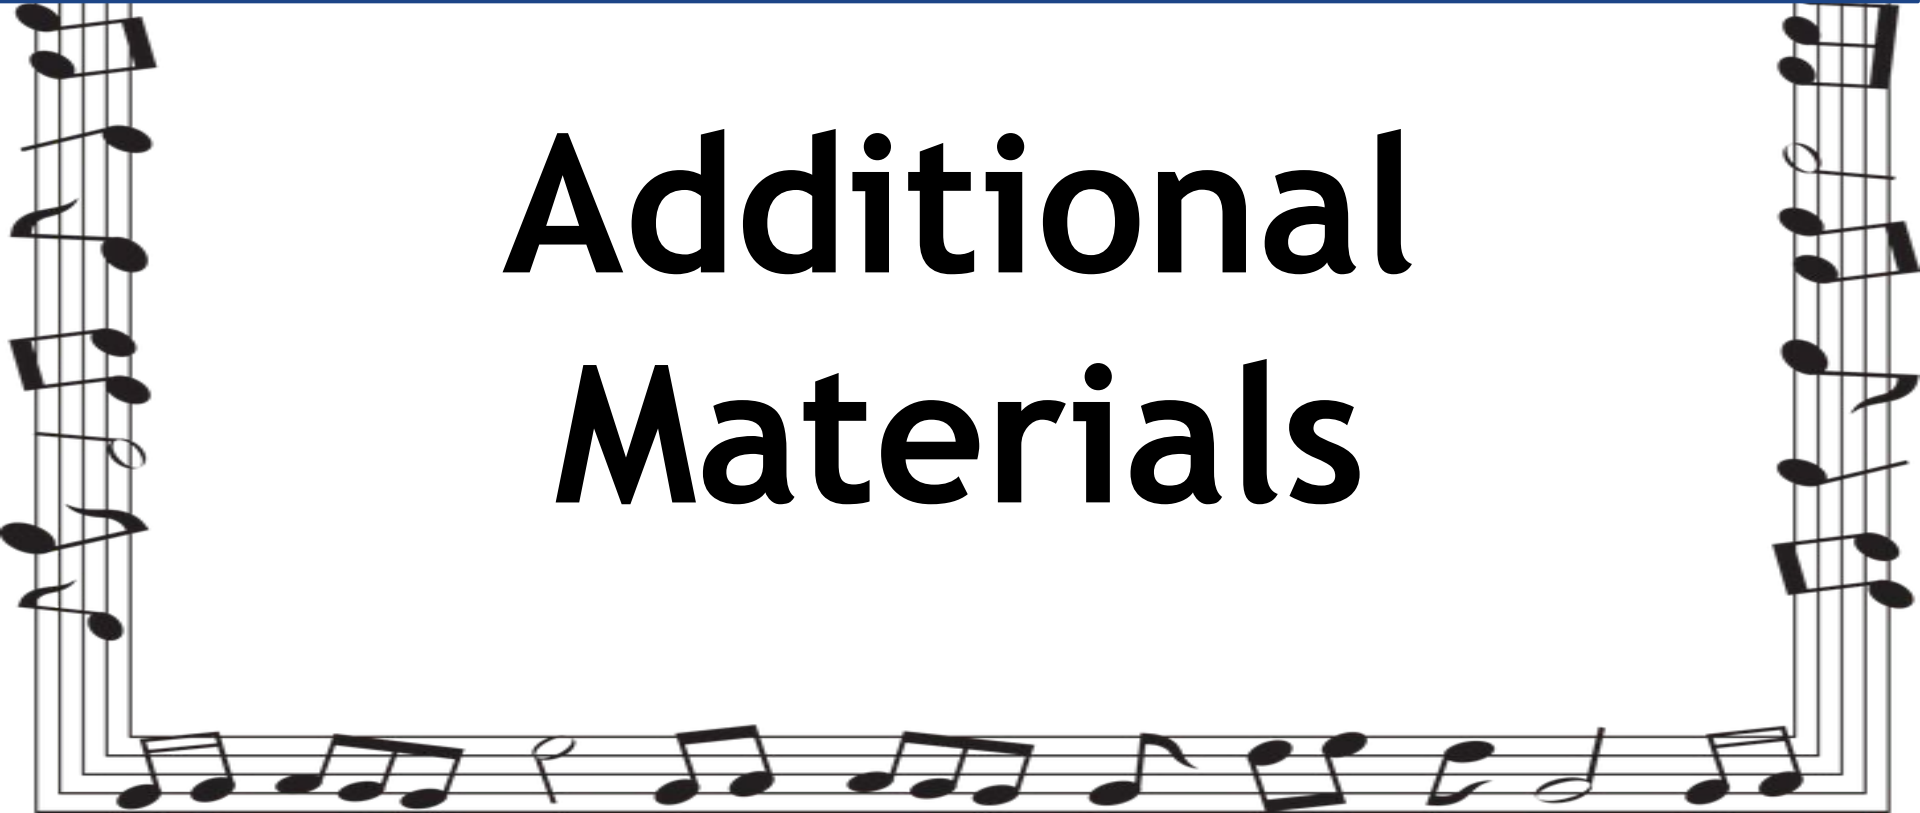

***You should now look
like this!***

**Your mission should you choose to
accept it is to undo and redo this
balanced sitting at least 10 times
today! Along with every time you
play!**

Additional Materials

Other sources may also help you find balance!

Yoga Balance:

Tai Chi Balance: Breathing Balance:

Self-Assessment

Explore your house to
find the best chair for
you to have balance.
Take some books for your feet!
