

Science Virtual Learning

# Kindergarten Reduce, Reuse, Recycle

April 07, 2020

# Kindergarten Science

## Lesson: April 06, 2020

### **Learning Target:**

Students will be able to reduce their impact on the environment.

## **Background: This is a beginning lesson of Reducing our Impact Science Unit.**

- Students have learned what natural resources are and what we use them for.

### **Let's Get Started:**

1. Tell someone how you think that materials get recycled.

### **Watch Video:**

2. [Recycling Center- Virtual Field Trip](#)

## Practice #1:

What is the first step in the recycling process?

Think back to the video.

- What was the first step you saw?

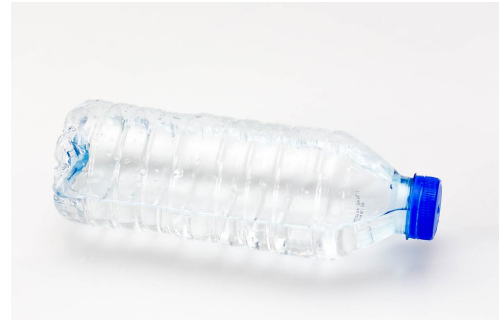

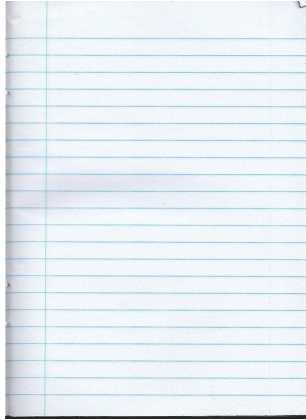

## Practice #2:

### Which of these items can be recycled?

Think back to the video.

- What items did you see in the video?

# Practice #3:

## What can be made out of recycled items?

Think back to the video.

- What items did we learn can be made?

# Practice on your own: Recycle Practice!

Look for items in your house that you can be recycled.

1. Look around your house and count how many items can be recycled.
2. Find an a few items in your home that could be recycled. Use the items and your imagination to build something new!

**MORE Practice on your own:**

Go to this website:

[Recycling Game!](#)

1. Click on start to begin
2. Click on the items to sort into the trash bin, recycling bin, or compost bin
3. Have fun and play again!

## Self Check:

Go tell someone in your home your answers.

1. Was this lesson?

- easy,
- just right
- hard

2. Brainstorm with someone in your house about how you can recycle items at home.
