

Math Virtual Learning

Kindergarten 2D Shapes

April 9th, 2020

Kindergarten Math

Lesson: April 9, 2020

Learning Target:

Students will be able to describe the number of vertices and sides on a rectangle.

Background: This is a lesson introducing shapes

- Students can show the sides and vertices of a triangle.
- Students can show the sides and vertices of a square.
- Students can show the sides and vertices of a circle.

Let's Get Started:

1. [Jack Hartman: Shapes, Sides, and Vertices](#)

Review

Square

I have 4 sides and 4 vertices.

My sides are always equal in size.

[Square Song](#)

Circle

I have 0 sides and 0 vertices.

[Circle Song](#)

Triangle

I have 3 sides and 3 vertices.

Sometimes my sides are equal. Sometimes, they are not.

[Triangle Song](#)

Rectangle

I have 4 sides and 4 vertices (corners).

2 of my sides are longer, and 2 of my sides are shorter.

[Rectangle Song](#)

- What shape do you see?
- How many sides does the rectangle have?
- How many vertices (corners) does the rectangle have?

Practice #1:

Practice 2:

How many
rectangles
can you
find?

Practice 3:

How many
rectangles
can you
find?

Practice on your own: Shape Practice!

1. Can you find 5 rectangles in your home?
 - Can you count their sides and vertices?

2. Can you find 5 rectangles outside?
 - How many sides and vertices do they have?

More Practice on Your Own: Visit these websites:

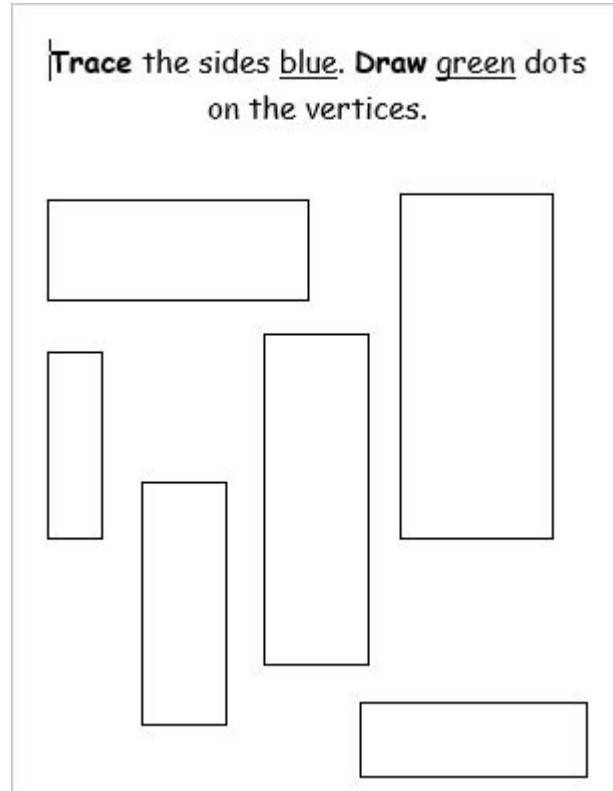

[Top Marks: Shape Monsters: A 2D Shapes Sorting Game](#)

1. Click the white triangle to begin.
2. Click on the green ON button.

Practice:

Complete this page in your packet.

Click here to open worksheet.

Self Check:

Go tell someone in your home your answers.

1. Was this lesson?

- easy,
- just right
- hard

2. Draw a city using rectangles.
