April 9, 2020

Kindergarten Math  
Lesson: April 9

**Learning Target:**

Today we are going to practice our numbers in  
the teens 14-15-16!

**Background:** Students will be counting objects to see how many:

- Students will count to see how many
- Students will be able to tell how they see the objects.

**Let's Get Started:**

1. Review counting to 20
2. Identify teens numbers
3. Watch Video:

# Warm Up

Let's Practice Counting to 100

# Practice #1: Let's Get Started

Count out loud to see how many fruits there are.  
If you have to touch each one that is great.

# Let's find Out

How many did you  
count?

How did you see the  
fruit?

I saw 8 and 8 which  
makes 16.

# How else could you have see the fruit?

You could have seen 4  
and 4 and 4 and 4 which  
makes 16.

How else could you see it?

## Practice #2: *Keep up the good work!*

Count the objects use your

to point if you need some

extra help.

How many did you count?

# Let's Find Out

How did you see the sea creatures?

I saw 5 and 5 and 5 more.

That makes 15. Way to go!

# Find Another Way

Show an adult another way you could see 15.

Practice #3:  
*Let's Work One More*

How many do you see?

How do you know?

Remember to count  
carefully.

## Let's Check

How many did you count?

I saw 5 and 5 and 4  
which makes 14.

How did you see it?

## Practice on your own:

1. Write your numbers from 0-20 on a sheet of paper.
2. Draw your own pictures and try and see how many combinations someone at home comes up with.
3. Draw another set of pictures and see how many combinations you can come up with.

Practice on your own:  
Play This Fun Game

[Greg Tang Math](#)

## Self Check:

Go tell someone in your home your answers.

1. Was this lesson?

- easy,
- just right
- hard

2. Count to 100 to someone at home.
