**SpEd Program K-5**

**3D Shapes**

**April 22, 2020**

Math Problem Solving  
Lesson: April 22, 2020

**Learning Target:**

Students will be able to identify the number of edges, vertice, and faces of a cone.

## Background: Students will be learning about 3D shapes

- Students can show the sides and vertices of a 2D shape.
- Students can show the edges, vertices, and faces of a cube.
- Students can show the edges, vertices, and faces of a cylinder.
- Students can show the edges, vertices, and faces of a sphere.

## Let's Get Started:

1. [Jack Hartmann: 3D Shapes](#)

Remember that 2D and 3D shapes are similar.

## Review

### Cube

I have 12 edges.  
I have 8 vertice (corner).  
I have 6 square faces.

My edges and faces are  
always the same size.

[Cube Song](#)

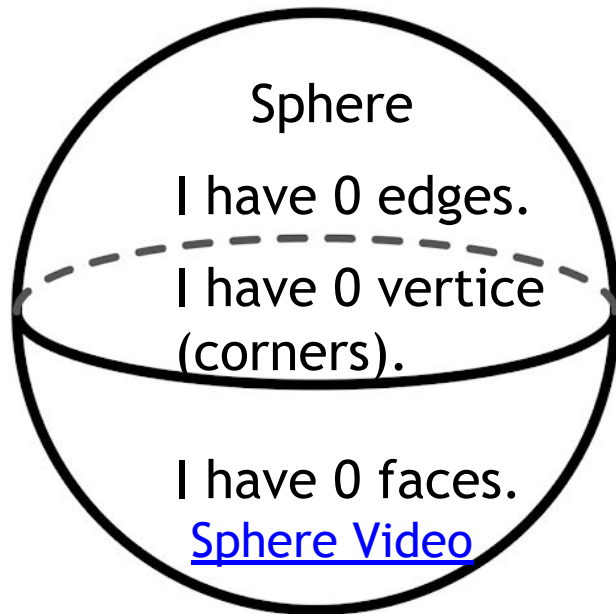

### Sphere

I have 0 edges.

I have 0 vertice  
(corners).

I have 0 faces.

[Sphere Video](#)

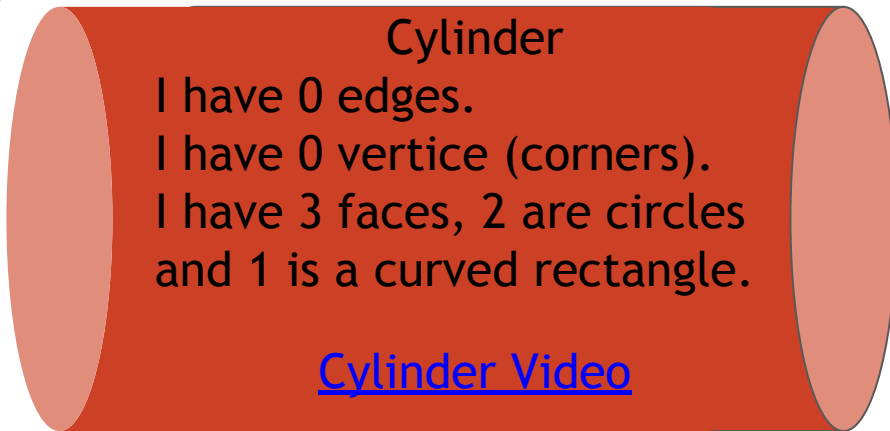

### Cylinder

I have 0 edges.

I have 0 vertice (corners).

I have 3 faces, 2 are circles  
and 1 is a curved rectangle.

[Cylinder Video](#)

# Cone

I have 0 edges.  
I have 1 apex (point).  
I have 1 face.

[Cone Video](#)

# Cone

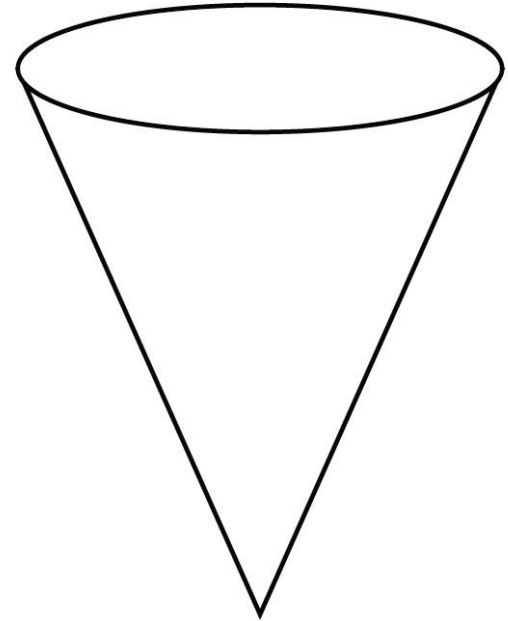

Examples of cone shape:

## Practice #1:

- What shape do you see?
- How do you know?

Practice 2:

How many  
cones can  
you find?

Practice 3:

How many  
cones can  
you find?

Practice 4:

How many  
cones can  
you find?

# Practice on your own: Shape Practice!

1. Can you find 2 cones in your home?
  - Can you count faces, apex and sides?
  
2. Can you find 2 cones outside?
  - Can you count faces, apex, and sides?

## More Practice on Your Own: Visit these websites:

1. [Monster 3D Match](#)
  - Click the arrow to start
  - Click Pictures to Pictures
  - Click Show Me
2. [PBS Kids: Peg + Cat: Magical Shape Hunt](#)

## Self Check:

Go tell someone in your home your answers.

1. Was this lesson?

- easy,
- just right
- hard

2. Draw a picture of your favorite ice cream on a cone.
