

Performing Arts Virtual Learning

**7 & 8 Stagecraft
Lighting Design**

May 15, 2020

7 & 8 Stagecraft

Lesson: May 15, 2020

Objective/Learning Target:

Understanding basic terminology and equipment used
in lighting design

IT'S
FRIDAY
FUN
WITH
LIGHT!!!

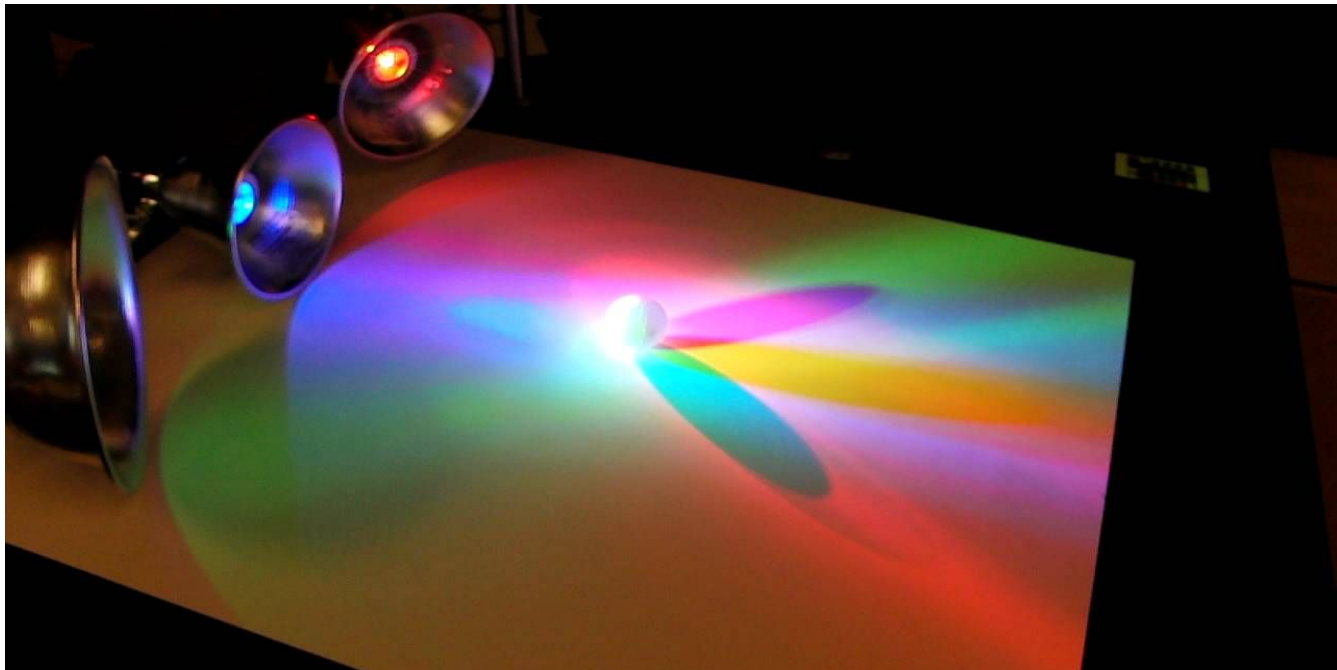

What we know now:

Yesterday we learned that primary colors of pigment and primary colors of light are different.

Can you name the 3 primary colors of light?

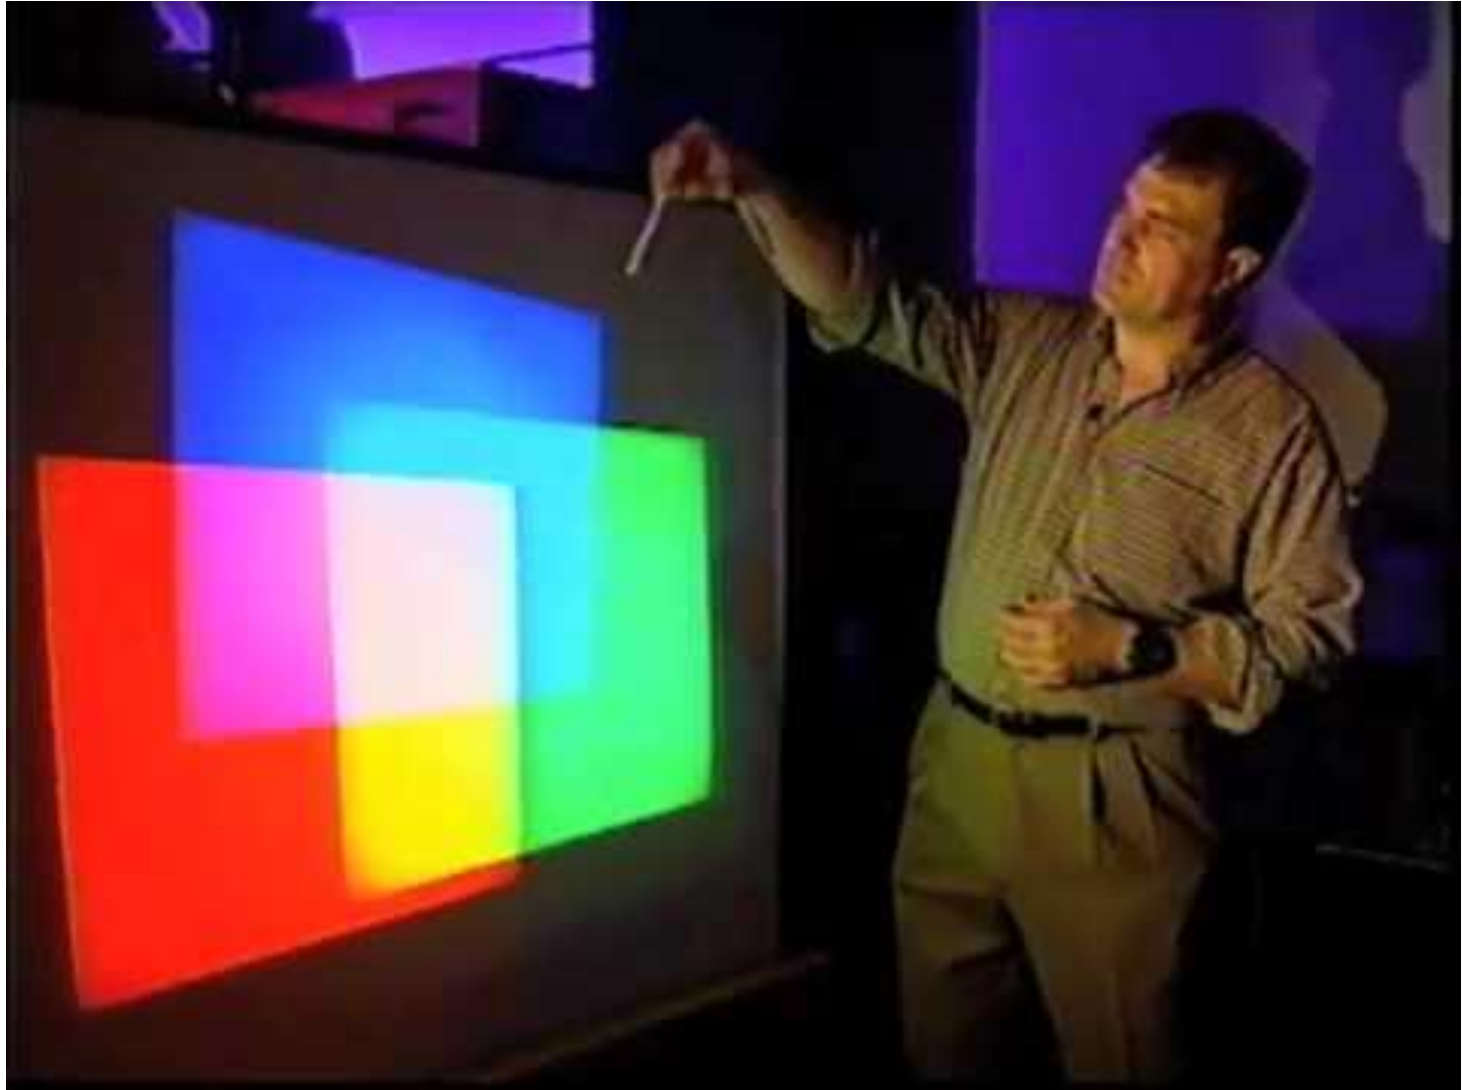

Can you name the secondary colors of light?

If not refer back to May 14th lesson

Watch this 'Color of Light' Demonstration Video

[Discovery YAFI -- Colours of Light](#)

A Fun At home lighting experiment

What you will need:

- **3 clear glass containers (I used empty jars)**
- **Food Coloring**
- **3 light sources (Flashlights would be ideal, the light needs to be directed, lamps will not work)**
- **A white background**

In your 3 glass containers mix water and food color to create 1 container of red, 1 container of blue, and 1 container of green.

Now just have fun shining the light through the colored water and see if you can create secondary colors and or white light

CLEAN UP YOUR MESS

Have a Great Weekend!
