## Middle School NES Math

## April 15, 2020

# Middle School NES Math Lesson: April 15, 2020 

## Objective/Learning Target:

Students will calculate the measure of vertical angles.

## What are vertical angles?

Watch in English
Watch in Spanish

## Vertical angles -ces Introduction

$m \angle C E A+110^{\circ}=180^{\circ}$
$m \angle C E A=70^{\circ}$

Khan Academy

## Vertical Angles - Add to Notes

## Vertical Angles

Opposite angles have equal measures.

$$
48^{\circ}=48^{\circ}
$$

$48^{\circ}$

## Pronunciation Practice

Click on each word or phrase. Then click the button to hear the word. Repeat each word or phrase.

## vertical angle

opposite
equal

## degrees

Opposite angles have equal measures.

## Practice calculating the measure of angles.

## Practice in English

## Practice in Spanish

## More Practice - Use the figure on the right to answer the questions.

1. Name a pair of supplementary angles.
2. Name a pair of complementary angles.
3. Name a pair of vertical angles.
4. Find $m \angle F B C, m \angle A B F$, and $m \angle D B E$.

## More Practice - Answers

1. Name a pair of supplementary angles. $\angle A B D$ and $\angle C B D ; \angle A B E$ and $\angle C B E$; $\angle D B E$ and $\angle F B E ; \angle D B C$ and $\angle F B C$
2. Name a pair of complementary angles. $\angle A B D$ and $\angle D B E$
3. Name a pair of vertical angles. $\angle A B D$ and $\angle F B C ; \angle A B F$ and $\angle C B D$
4. Find $m \angle F B C, m \angle A B F$, and $m \angle D B E$.

$$
\begin{aligned}
& m \angle F B C=40^{\circ} \\
& m \angle A B F=140^{\circ} \\
& m \angle D B E=50^{\circ}
\end{aligned}
$$

## Additional Practice:

## English

## Spanish
