7th Grade ELA  
Lesson: May 19, 2020

**Objective/Learning Target:**

- **Students will learn a new word game to exercise their brains in a new and fun way.**

# Boggle

# Learn:

Boggle is a word game where you try to create as many words as possible.

The goal of the game is to have the highest point total. To gain points, players must create words from the randomly assorted letters in the cube grid. The longer the word, the higher the point value of the word.

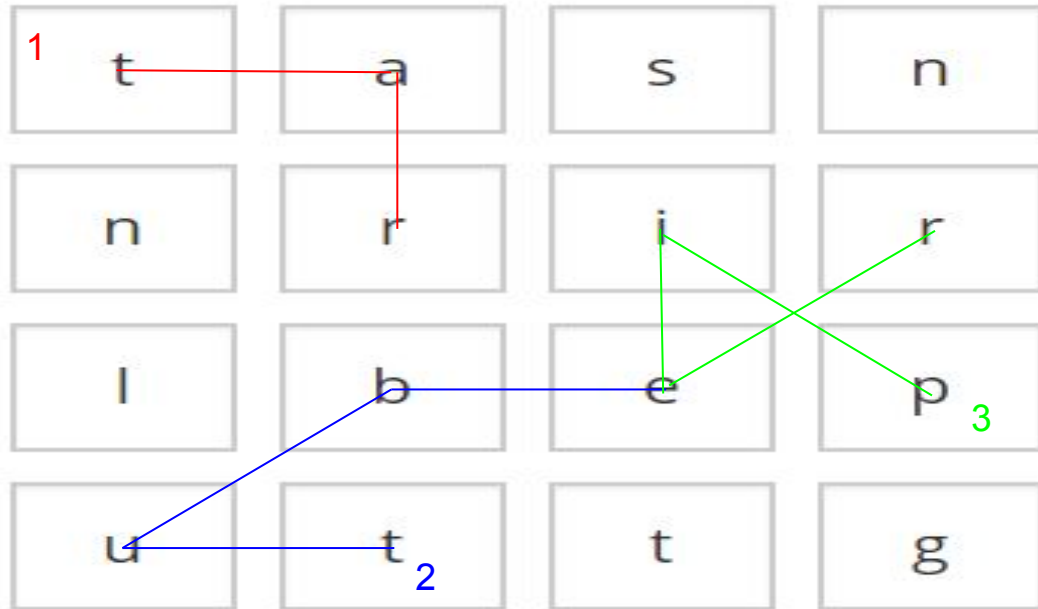

Words should be created by using adjoining letters – the letters must touch each other – and must be able to connect to each other in the proper sequence to spell the word correctly. The letters may join in any direction – horizontally, vertically, or diagonally. This means that the letters can be above or below, side by side, or touching corners. Words can be spelled in any direction, including backwards.

# Learn:

If you are still confused by the rules of the game, watch this video:

# Practice Boggle

1. Tar
2. Tube
3. Pier
