

**Guitar Virtual Learning**

**8th Grade Guitar**

**Music Theory**

**April 15, 2020**

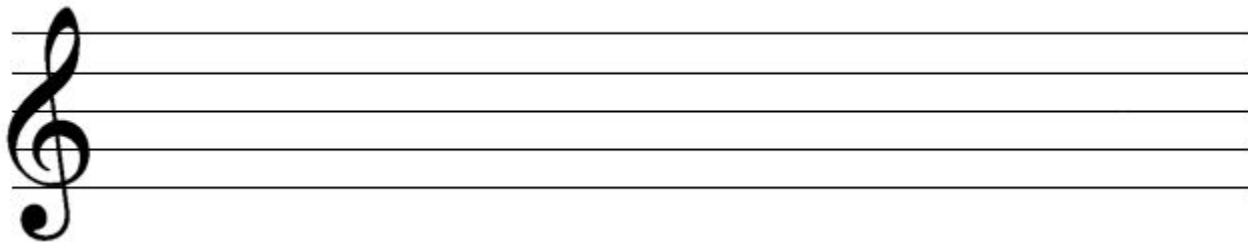

Lesson: 4/15/20

## **Objective/Learning Target:**

Review the Lines and Spaces of the Treble Clef and compare with Guitar Tablature

## Warm Up: Identify the Lines and Spaces of the Treble Clef

# Guitar Tablature

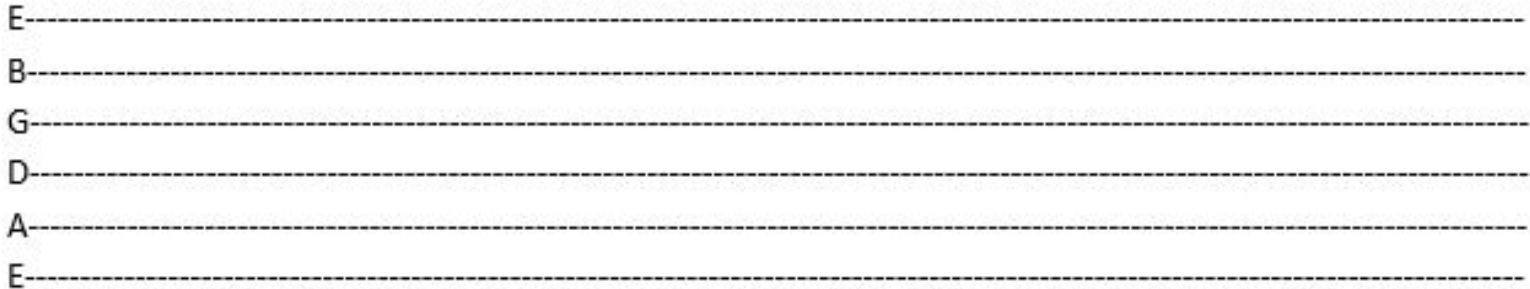

Tablature is the notation specifically used to guitars. The structure is completely different from standard notation and serves as the “blueprint” for how to play a song.

[Intro to Guitar Tabs](#)

## How to Remember:

Previously, we discussed the acronym “Eddie Ate Dynamite, Good Bye Eddie” to remember the letter names for each guitar string. Tablature uses 6 lines instead of 5, a line for each string. As noted in the video, the string with the lowest pitch is the lowest line and vice versa.

## Lets Practice!

Identify the letter names for each string

A set of five horizontal dashed lines is provided for writing the letter names for each string. The lines are evenly spaced and extend across the width of the page. A small vertical line is present at the left end of the bottom-most dashed line, indicating the start of a string.

What do the numbers represent on guitar tabs?

## Comparing and Contrasting Standard Notation vs. Tablature

- 1). How many lines does the treble clef staff have? What about Tabs?
- 2). How does reading notes on the treble clef differ from tablature?
- 3). When would we use standard notation? Why might you use tablature instead for guitar?
- 4). Do you prefer learning guitar music on standard notation or tabs? Why?

## Extra Practice

Please use the website below to do some extra practice. If you feel good about identifying the treble clef lines and spaces, turn on challenge mode and see how many you can get right in a minute!

### [Music Theory Practice](#)

Look up some guitar tabs to see if there's music for songs you like! The websites below are great places to start. If you have a guitar, you could even practice these!
