Elective Virtual Learning

7th & 8th Grade Multimedia

Communicating Information Through Multimedia

May 14, 2020

7th & 8th Grade Multimedia Tech
Lesson: May 14, 2020

Objective/Learning Target:
Using my voice to share information through media

Warm Ups

Consider this...
Read the 2 new fact cards below.

Oberlo | **Most Popular Device**
Used to Listen to Podcasts

65%
of podcast listeners tune in using portable devices such as smartphones and tablets.
(Edison Research, 2019)

Oberlo | **Why People Listen**
to Podcasts

Nearly **three out of every four** podcast listeners in the US say they tune in to learn new things.
(Statista, 2019)

Quick write: Does having easy access to devices allow us to learn more? Why or why not?

Lesson/Background

If you have not worked on the component of your podcast...go back and do the previous lesson for May 13.

It's time to practice recording...so what needs to be in your Podcast?

Let's Listen... Here is my podcast on how to make your podcast.

So What are some resources you might need?

YouTube Audio Library
Soundtrap - to make loops music (intro & outro) and add your voice narration.
Garageband - free on Apple devices.- make music loops and add your narration.
Adobe Spark Video (you can even have icon images for parts of your podcast or a single logo for the entire podcast.*(if you downloaded the 2 student music podcasts you may have seen, they had still images in their podcasts)*
You could even use something like **Screencastify or WeVideo** and export only the audio.

There are some links to tutorials on the next slide if you would like to follow tutorials to learn about one or more of the apps above.

Practice

Resources to learn more or practice and choose what you want.

If you use a resource to record that would be useful to others, send me a link and I will share with other students

YouTube Audio Library - link to tutorial
Soundtrap - Link to tutorial
Garageband - Link to tutorial
Adobe Spark See other previous lessons for tutorials

Remember: gather your materials & script
Records your narration
Add your music loops (intro & outro) and sound effects
Let it sit overnight before making edits.

Assessment:

Share what you have recorded with someone. Get feedback for what you might add or delete.
Make those changes to your plan.

Extend your Learning

Find a podcast you like and send me the link telling my why I should listen to it.
